: Certificate Course in “Biofertilizer Production”

❖ Name of the Course	: Certificate Course in “Biofertilizer Production”
❖ Course Convener	: Dr.Suchita Khodke and Dr.Minal Keche
❖ Eligibility	: B.Sc.III (Botany)
❖ Intake capacity	: 40
❖ Course Hours	: 30 hrs.

❖ **Aim and overview**

Biofertilizer are biological products containing living microorganisms that, when applied to seed, plant surfaces, or soil, promote growth by several mechanisms such as increasing the supply of nutrients, increasing root biomass or root area and increasing nutrient uptake capacity of the plant. These are effective alternatives to the hazardous synthetic fertilizers.

Biofertilizers can prove a boon to sustain our agricultural production and to meet the demand of increasing population for agricultural-based products while conserving and sustaining the natural resources for future generation. Importance of biofertilizers in enhancing productivity and quality of agricultural products have already been proven through various research work carried out worldwide. Despite proving their potential, biofertilizers remain underutilized on a large scale. Therefore, the need of the hour is to promote the application of biofertilizers among farmers to obtain higher agricultural sustainability.

The aim of the certificate course in Biofertilizer production is to create awareness among students regarding benefits of biofertilizers in providing good soil health, sustaining productivity of natural resources, and attaining high productivity and higher cost–benefit ratio. Main aim should be on the quality control during production process of biofertilizers to keep their potency intact for long time. Also aim to produce and provide biofertilizers to farmers to accelerate the use of biofertilizers among farmers and biofertilizers should made easily available for farmers and large-scale production of

biofertilizer should be initiated by providing training and capacity building to industrial people, farmers, and other growers regarding production, quality control, and use of biofertilizers.

❖ Course Objectives

To provide the opportunities to the students to acquire the knowledge, values, commitment, and skills towards the following

1. Scope and classification of biofertilizer
2. Type of biofertilizer and their descriptions
3. Preparation of stock solutions and nutrient media

It is already been proven through various research work carried out worldwide.

Biofertilizer maintains the texture of soil and increasing productivity which will fulfill the requirement of food or increasing demand of food.

Report - Basics of Spoken English 2021-22

Vinayak Vidnyan Mahavidyalaya Nandgaon Khandeshwar is serving the rural area of Nandgaon Khandeshwar Taluka and this area is quite backward in the case of education. Most of the students of this region lack confidence and they have a big fear of the English language. Most of the students are unable to speak or communicate with those of others who knew English language. Taking this thing into consideration, the department of English Vinayak Vidnyan Mahavidyalaya Nandgaon Khandeshwar decided to run a certificate course for the students at the college.

After taking permission from the principal of the college and the IQAC, Asst. Prof. Rajiv Tayde from the department of English generated a notice for students to take admission in spoken English class. Many students showed their interest for the certificate course of spoken English.

On the day of inauguration function which was held on 15th of the November the function was presided by the honorable principal of the college Dr. Alka Bhise madam and chief guest of the function was IQAC coordinator Dr. Suchita Khodke madam. Dr Suchita Madam in their speech motivated students in such a way that they should take part in every college activity and enhance their personality in a better and promising way. In presidential speech, the principal madam appealed to students that they should take advantage of this course and should know how important the English language has become today.

When the teacher started to make students speak sentences in English by giving them the topic, teaching them English songs telling them how to introduce themselves with grammatical perfections, the interest of the student was growing day by day. On the evening of Christmas department of English organised a programme 'Christmas Carols' students sang Christmas songs.

To evaluate outcome of the course tutor Mr. Rajiv conducted a demonstrate you test for the students in order to know how much they got benefited by this spoken English course in that three categories were made, and each student has to give his introduction sing a song in English which was them during the course and narrate any incident in their life. Each category was for 10 marks each. All the students perform well and pass the certificate course with flying colours.

On the farewell program again, the function was presided by the principal of college Dr. Alka Bhise madam and post of chief guest was held by IQAC coordinator Dr. Suchita Khodke madam. Both congratulated the students on their successful completion of the certificate course, distributed certificates and asked them to continue the practice of speaking English. Some students demonstrated the skill they have learnt in the spoken English class. Dr. Alka Bhise madam and Dr. Suchita Khodke madam congratulated tutor and coordinator of the course Asst. Prof. Rajiv Tayde.

Final Test

Final Quiz

<p>Q1. The sum of three consecutive numbers is 93. The greatest among these three numbers is</p> <p>(a) 27 (b) 28 (c) 30 (d) 32</p>	<p>Answer: (d) 32 Let the three numbers are $x, x+1$ and $x+2$ Then $x+(x+1)+(x+2)=93$ $3x=90$ $x=30$ Greater Number=$(x+2)=32$</p>
<p>Q2. The sum of four consecutive even integers is 1092. The greatest of them is</p> <p>(a) 270 (b) 300 (c) 276 (d) 302</p>	<p>Answer: (c) 276 Let the four integers be $x, x+2, x+4$ and $x+6$ Then $x+(x+2)+(x+4)+(x+6)=1092$ $4x=1080$ $x=270$ Greater Number=$(x+6)=276$</p>
<p>Q3. 96×96</p> <p>(a) 9216 (b) 9261 (c) 9006 (d) 9466</p>	<p>Answer: (a) 9216 $=96 \times 96$ $=(96)^2$ $=(100 - 4)^2$ $=100^2 - (2 \times 100 \times 4) + 4^2$ Formula $[(a-b)^2=a^2-2ab+b^2]$ $=10000 - 800 + 16$ $=9200 + 16$ $=9216$</p>
<p>Q4. A train of length 250 meter long running at the speed of 10 m/sec. How much time it will take to cross a platform of 650 meter length ?</p>	<p>Answer: (d) 90 seconds Total length to cross the platform = $250 + 650 = 900$ meter</p>

(a) 60 seconds (b) 72 seconds (c) 85 seconds (d) 90 seconds	So the time taken by the train = $(900/10) = 90$ sec
Q.5 A train with a uniform speed crosses a pole in 2 seconds and a bridge of length 250m in 7 seconds. The length of the train is ? (a) 85 metre (b) 100 metre (c) 105 metre (d) 125 metre	Answer: (b) 100 metre Let the length of the train is x metre Speed of the train is, $x/2 = (x + 250)/7$ $7x = 2x + 500$ $x = 100$ metre
Q.6 A train travels first 160 Km at 64 Km/hr and the next 160 Km at 80 Km/hr. The average speed for the first 320 Km of the tour is (a) 57.24 km/hr (b) 71.11 km/hr (c) 78.32 km/hr (d) 91 km/hr	Answer: (b) 71.11 km/hr Total time taken = $(160/64) + (160/80)$ hrs = $9/2$ hrs Average Speed = $(320 \times (2/9))$ km/hr = 71.11 km/hr
Q.7 A can do a work in 4 days and B can do the same work in 3 days. How long it will take if both A and B do the work together ? (a) 1 days (b) 1 days 5/7 hours (c) 2 days 3 hours (d) 3 days	Answer: (b) 1 days 5/7 hours A's 1 day's work = $1/4$ and B's 1 day's work = $1/3$ So (A+B)'s 1 day's work = $(1/4 + 1/3) = 7/12$ So A and B will finish the work in $12/7 = 1$ days 5/7 hours
Q.8 A can complete a work in 2 days and B can complete the work in 3 days. With the help of C they together completed in 1 day. C alone can complete the work in ? (a) 2 days (b) 4 days (c) 6 days (d) 7 days	Answer: (c) 6 days If C alone can finish the work in x days, then $1/2 + 1/3 + 1/x = 1$ $1/x = 1 - 1/2 - 1/3$ $1/x = 1/6$ So C alone can finish the work in 6 days.
Q.9 Ram and Rohit together can finish a job in 10 days. Ram can do the same job on his own in 12 days. How long will Rohit take to do the job by himself a) 40 days (b) 60 days (c) 80 days (d) 100 days	Answer: (b) 60 days (Ram + Rohit)'s 1 day's work = $1/10$ Ram's 1 day's work = $1/12$ \therefore Rohit's 1 day's work = $(1/10) - (1/12) = (6-5)/60 = 1/60$ \therefore Rohit can finish the work in 60 days
Q.10 A man is walking at a speed of 10 km/hr. After every kilometer, he takes rest for 4 minutes.	Answer: (a) 96 minutes For travelling 10 km he will take rest 9

How much time will he take to cover a distance of 10 km ? (a) 96 minutes (b) 100 minutes (c) 60 minutes (d) 90 minutes	times each of 4 minutes So the total time taken to travell 10 km $=60 + 36$ $=96$ minutes
Q.11 A car completes a journey in 11 hours, the first half at 30 km/hr and the second half at 25 km/hr. Find the distance travelled ? (a) 250 km (b) 375 km (c) 300 km (d) 400 km	Answer : (c) 300 km Let the distance travelled be x km $(x/(2 \times 30)) + (x/(2 \times 25)) = 11$ $x/60 + x/50 = 11$ $(5x + 6x) / 300 = 11$ $x = 300$ km
Q.12 A car moves at the speed of 72 km/hr. What is the speed of the bus in metres per second ? (a) 15 metre/sec (b) 18 metre/sec (c) 20 metre/sec (d) 26 metre/sec	Answer: (c) 20 metre/sec Speed of the car = $72 \times (5/18) = 20$ metre/sec
Q.13 Find the average of first 20 natural numbers ? (a) 6 (b) 7.5 (c) 10.5 (d) 12	Answer:
Q.14 Total sale of a shop is 7770 Rs in a week. Find the daily average sale of the store ? (a) 111 (b) 1110 (c) 770 (d) 999	Answer:
Q.15 The average of three odd number is 45. What is the value of the highest number ? (a) 33.3 (b) 42.3 (c) 45 (d) 47.5	Answer:

Certificate Course in Ornamental Fish Culture

Department of Zoology Vinayak Vidnyan Mahavidyalaya conducted a certificate course in ornamental fish culture for the student of BSC Biology group. The prerequisite for the certificate course was that the student should be appearing for second year and final year examination. The student must have scored more than 45% in in his final examination. in all 25 student participated from BSC part 2 and BSC part 3 . The course started in the month of February 2020.

The idea behind starting this certificate course was to inculcate among the student The commercial aspect of ornamental fishery also the motivation behind initiating this course was is an alternate source of income for the farmers. Most of the student from our Institute belong to the agriculture background and their parents are active farmers with very little landholdings this makes the situation was for a family to earn the daily bread and butter. Keeping this thought in mind it was planned to start a course in alignment with the agricultural practices. In the recent year Government of Maharashtra started a scheme of farm pond with 100% subsidy. This is a great opportunity for the students to learn and understand the nuances of the inland fisheries as well as the most recent ornamental fishery.

The course contain of 6 units dealing in detail with the theoretical, technical and practical aspects. The ornamental fishes are easy to commercialize and better profit in comparison to commercial carp .however the technical difficulties that is faced by the retailers must be understood before starting the ornamental fishery. Discussed in detail in the certificate course and notes where provided for ready references. Field visits were organised at a local aquarium shop to get the glimpse of different products that are available in ornamental fish for sale. Students were guided buy this distributors and retailers regarding the storage and transportation of ornamental fishes also the breathing techniques word discuss in detail during the course which would help the participants experimentally breed various ornamental fishes

Context

Today, Henna is mainly used in celebration of special occasions such as weddings and birthdays in the joyous gathering of people. The Henna paste symbolizes good health and prosperity in marriage, and in some cultures, the darker the henna stain, the deeper the love between two individuals. Now Mehendi designing is widely recognized as a creative profession. In a fast moving world, everyone chooses to become a top notch well known professionalist. However, people forget what their passion is and go with the flow to become something that their parents impose on them. A new career that has started gaining grip these days is to start a Mehendi business. Students can now make their career as a Mehendi artist and become successful by earning of money. This is probably among the best career options for girls after degree if they like making Mehendi designs. as Mehendi designing skills are taught easily and at low cost. Apart from students regular academic activities, if self employment skills like Mehendi designing are taught and trained for girls, they would become self sustained to attain self lively hood in future. Hence it is proposed to organize this course in our institute.

**CERTIFICATE COURSE ON DESIGN & FABRICATION OF
REGULATED DC POWER SUPPLY**

From 07/12/2020 to 23/12/2020

Objectives:

- ❖ Regulated DC power supplies provide accurate DC voltage, which are derived from AC mains. These DC supplies are cheaper in nature than the DC sources from battery.
- ❖ Such supplies provide constant voltage irrespective of load variations for which they are designed.
- ❖ DC power supplies are used extensively in various electronics laboratories, industries and communication departments to feed DC voltage to the electronic modules, R and D sections, institutions and colleges to impart practical training etc.
- ❖ Present range of electronic equipment produced in the country makes use of transistors and integrated circuits. These IC's are designed to work on fixed regulated DC voltages.

Eligibility: 12th Science, Diploma / B.Tech / BE / ITI / B.Sc. in Physics, / Electronics / Telecommunication / Instrumentation /Electrical.

Duration: 45 hours (30 Hours Theory + 15 Hours Practicals)

Outcome: After completion of course, the Student should be able to:

- ❖ Apply safe working practices.
- ❖ Acquire knowledge on operation of nonisolated and isolated DC-DC Converters.

Introduction

In rural India it has been profoundly seen that agriculture is the only source of earning. However the uncertainty of rain and ever increasing cost of fertilizers, seeds and farm labor has made it really an impossible affair. It has been suggested many times that an allied business with agriculture practice could help and also support the earning of a farmers family. Focusing mainly on this idea, the department of zoology has initiated the certificate courses in various fields. Certificate course in Beekeeping is one such Course to promote self-reliability among the wards of farmers. The syllabus of this course modularized offering opportunity to learners to study techniques in Beekeeping theoretically, practically and experimentally by directly working with established and successful entrepreneurs in this field. The institute is located in rural area and apparently serve the students who have an agriculture background. This course of Beekeeping could prove to be of a significant help not only in terms of monetary gains but also the ecological significance. The presence of Bee in and around the crop land increases the production of the crops by 30% hence installing bee hives in the farm land could prove to be of Double benefit, one the honey from the hieves could earn the amount while the inherent nature of bee to pollinate could also increase the production.

The present Career Oriented Course (COC) in '**Beekeeping**' is introduced for Undergraduate students of Science and Commerce faculty for the academic year 2020-21 with a view to enhance essential for employability, sustainability and agriculture enhancement. वारवट बकल, वृत्तज्ञा भी हैं। साथ ही साथ डॉ. पल्लवी सिंह सहायक प्राध्यापक, प्राणीशास्त्र विभाग भारतीय महाविद्यालय, अमरावती इनका मार्गदर्शन भी सर्टिफिकेट कोर्स में रहेगा और ये सभी मधुमक्खी पालन के विभिन्न विषयों पर छात्रों का मार्गदर्शन करेंगे। पाठ्यक्रम का उद्घाटन ७ जुलाई २०२१ को डॉ. अलका भिसे, विनायक विज्ञान महाविद्यालय, नांदगांव खंडेश्वर के हार्थों से किया गया। बज्ज कॉलेज ऑफ साइंस (स्वायत) में जून/जी विभाग के सहायक प्रोफेसर डॉ. वैभव खंडेकर को उपस्थित में इस सर्टिफिकेट पाठ्यक्रम का विधिवत उद्घाटन किया गया। डॉ. खंडेकर ने उद्घाटन समारोह में छात्रों का मार्गदर्शन किया। उन्होंने पाठ्यक्रम को उपयोगिता के बारे में छात्रों को समझाया और मधुमक्खी पालन से होने वाले वित्तीय लाभ के बारे में भी बताया। उन्होंने मधुमक्खी

पालन के क्षेत्र के लिए एक सशुद्धिकीय संदर्भ दिया और छात्रों को ऐसे सर्टिफिकेट कोर्स में दाखिला लेने के लिए बधाई दी जो उनके कौशल को बढ़ाएंगे। कार्यक्रम के मूडवा वक्ता वैभव खंडेकर का परिचय प्राणिशास्त्र प्रमुख डॉ. प्रतिभा महलने ने दिया। समारोह को अध्यक्ष डॉ. अलका भिसे ने भी प्राणीशास्त्र विभाग के प्रवासों की तरफत की और इस तरह के सर्टिफिकेट कोर्स के संचालन के लिए आयोग टीम को बधाई दी। उन्होंने विदर्भ क्षेत्र के किसानों को दुर्दशा का भी उल्लेख किया और इसलिए पाठ्यक्रम के महत्व पर भी प्रकाश डाला। डॉ. नवीन/सिंह पचनेरे ने पाठ्यक्रम का परिचय दिया और पाठ्यक्रम का महत्व समझाया और पाठ्यक्रम के विभिन्न चरणों को भी जानकारी दी। जून/जी विभाग के सहायक प्रोफेसर सुबोध बंसोड ने पूरे कार्यक्रम का संचालन किया। डॉ. स्वप्नित तिनडेंडे जून/जी विभाग के सहायक प्रोफेसर ने आधार प्रस्ताव प्रस्तुत किया।

During the course students had gone through many activities, such as tongue twister exercise, situational speaking, mock interviews, pen your feelings etc. Along with activities, students were given grammar practice. Teacher of the course Rajiv Tayde taught students to sing English songs; students enjoyed this activity a lot. Students also learn to translate the sentences from their native language to English language and vice-versa. The evaluation was made based on students' skill to sing English songs, how they introduced themselves, and a topic was given to them to speak something on it.

In the farewell program students demonstrated the skills they learn in the course some sang English songs, some gave their introductions in English, and some students recited tongue twister exercises and asked their friends to recite after them. The program was presided over by Principal of the college, Dr. Alka Anant Bhise madam, in her presidential speech she congratulated students and the teacher as well and wishes them all the best for their future. Chief Guest of the program was Dr. Suchita Khodke madam, she said that she is incredibly happy to see the students of the rural background constructing English sentences of their own. Total twenty-seven students were benefitted by the certificate course.

Session-2019-20

Objectives:

- To enhance computation skills in students.
- Improve mathematical calculations.
- To develop analytical thinking through Vedic Mathematics

About Vedic Mathematics:

Vedic Mathematics was discovered by Indian mathematician Jagadguru Shri Bharathi Krishna Tirtha in the period between A.D. 1911 and 1918. Later the findings were published in form of a book on Vedic Mathematics by Tirthaji Maharaj who was also known as Bharati Krsna. Bharati Krsna was born in 1884 and died in 1960. He was a brilliant student, obtaining the highest honours in all the subjects he studied, including Sanskrit, Philosophy, English, Mathematics, History and Science. When he heard what the European scholars were saying about the parts of the Vedas which were supposed to contain mathematics he resolved to study the documents and find their meaning. Between 1911 and 1918 he was able to reconstruct the ancient system of mathematics which we now call Vedic Mathematics. Vedic Mathematics is a collection of Techniques/Sutras to solve mathematical arithmetic in easy and faster way. It consists of 16 Sutras (Formulae) and 13 sub-sutras (Sub Formulae) which can be used for problems involved in arithmetic, algebra, geometry, calculus, conics. Vedic Mathematics is a system of mental Mathematics. Many of the Vedic methods are interrelated. This is in complete contrast to the modern system. Using regular mathematical steps for solving problems at times are intricate and time consuming. But using Vedic Mathematics' General and Specific Techniques numerical calculations can be done very fast and accurately. Vedic Mathematics saves a lot of time, as calculations are much easier and faster. Definitely these techniques would be handy for the students during exams and particularly for the competitive exams which are time bound.

Motivation:

In rural India it has been profoundly seen that agriculture is the only source of earning. However the uncertainty of rain and ever increasing cost of fertilizers, seeds and farm labour has made it really an impossible affair. It has been suggested many times that an allied business with agriculture practice could help and also support the earning of a farmers family. Focusing mainly on this idea, the department of zoology of Vinayak Vidnyan Mahavidyalaya, Nandgaon (kh) has initiated the certificate courses in various fields. Certificate course in Ornamental Fishery is one such Course to promote self-reliability among the wards of farmers. The syllabus of this course modularized offering opportunity to learners to study techniques in ornamental fishery theoretically, practically and experimentally by directly working with established and successful entrepreneurs in this field.

Objectives of the course:

- 1) To inculcate importance of ornamental fishery in relation with entrepreneurship development.
- 2) To give students knowledge about various techniques of ornamental fish breeding, rearing and it's marketing to make them self-sustainable after graduation.
- 3) To teach techniques of construction of glass aquarium and its maintenance.
- 4) To teach students about fish food production and health related problems with ornamental fish.

Outcome of the course:

- 1) At the end of the course student will be familiar with Various Ornamental Fishes.
- 2) At the end of the course student will be able to breed and rear the ornamental fishes.
- 3) At the end of the course students will develop entrepreneurial skill.

Certificate Course In Ornamental Fish Culture

Department of Zoology Vinayak Vidnyan Mahavidyalaya conducted a certificate course in ornamental fish culture for the student of BSC Biology group. The prerequisite for the certificate course was that the student should be appearing for second year and final year examination. The student must have scored more than 45% in in his final examination. in all 25 student participated from BSC part 2 and BSC part 3 . The course started in the month of February 2020.

The idea behind starting this certificate course was to inculcate among the student The commercial aspect of ornamental fishery also the motivation behind initiating this course was is an alternate source of income for the farmers. Most of the student from our Institute belong to the agriculture background and their parents are active farmers with very little landholdings this makes the situation was for a family to earn the daily bread and butter. Keeping this thought in mind it was planned to start a course in alignment with the agricultural practices. In the recent year Government of Maharashtra started a scheme of farm pond with 100% subsidy. This is a great opportunity for the students to learn and understand the nuances of the inland fisheries as well as the most recent ornamental fishery.

The course contain of 6 units dealing in detail with the theoretical, technical and practical aspects. The ornamental fishes are easy to commercialize and better profit in comparison to commercial carp .however the technical difficulties that is faced by the retailers must be understood before starting the ornamental fishery. Discussed in detail in the certificate course and notes where provided for ready references. Field visits were organised at a local aquarium shop to get the glimpse of different products that are available in ornamental fish for sale.

Students were guided buy this distributors and retailers regarding the storage and transportation of ornamental fishes also the breathing techniques word discuss in detail during the course which would help the participants experimentally breed various ornamental fishes

To summarise the course was successfully attended and completed by all 25 students and some changes were made in the teaching method for the next and forthcoming batches

Report on Certificate course in ornamental fish culture –

Department of Zoology of Vinayak Vidnyan Mahavidyalaya successfully conducted certificate course in ornamental fish culture for the students of B.Sc. final year students. In the Nandgaon and its nearby villages agriculture is the main source of earning. So ornamental fish breeding will increase the earning of farmers. This course was organized to promote self-reliability among the students. This course in ornamental fish breeding will surely promote the student for self-reliability. The syllabus and content are easy to understand and easily applicable. This course provides the knowledge and technique of large scale fish breeding project. Along with this the course also provides the information about fish food production. The main objective behind this course is to indicate the importance of ornamental fish in relation with entrepreneurship development from the ornamental fish breeding. The course conducted during 02 February 2020 to 7 March 2020. The course was of 30 hours duration which contains theory, practical and field visit. This course contains introduction to aquaculture and ornamental fish trading, fish diseases and their proper management, fish breeding and rearing of live bearers, rearing in egg layers, introduction to aquarium plants and its propagation techniques engineering aspects and construction of aquarium and the practical session will provide the information of identification of common live bearer ornamental fishes such as Guppy, molly, platy, sword tail fishes, egg layers ornamental fishes such as angel, neon tetra etc. so this course provides complete knowledge of fish breeding. Total 20 students from B.Sc. II and B.Sc. III year participated in the course. For this course Dr. Pratibha Mahalle, Dr. Gajendra Singh Pachlore, Dr. Swapnil Tinkhede and Mr. Subhodh Bansod guided the students. Theory as well as practical sessions help the students to understand the course. At the end of the course students become familiar with various ornamental fishes as well as students are able to breed the ornamental fishes. This course also enables students to develop entrepreneurship skill.

A proposal to start E Certificate Course in 'Plant tissue culture'

- ❖ **Name of the Course:** E- Certificate Course in 'Plant tissue culture'
- ❖ **Course Convener and Co-convener:** Dr.Suchita Khodke and Mr.S.V.Hiwarale
- ❖ **Eligibility:** Open for all
- ❖ **Intake capacity:** No limit (Online)
- ❖ **Course Hours:** 30 hrs.
- ❖ **Course aim and overview**

Tissue culture is a collection of techniques used to maintain or grow plant cells, tissues, or organs under sterile conditions on a nutrient culture medium of known composition. It is widely used, to produce clones of a plant in a method known as micropropagation. Plant tissue culture may be used for genetic modification of a plant or simply increase its yield. The cells of the plants can be genetically altered to produce plants with desirable characteristics. This technique utilizes the plant's ability to rejuvenate the tissues rapidly.

The aim of the e-certificate course in plant tissue culture is to improve the knowledge of students about the tissue culture and also aim to know the above mentioned applications.

- ❖ **Course Objectives**

To provide the opportunities to the students to acquire the knowledge, values, commitment, and skills towards the following

1. Basic concepts of Plant Tissue Culture
2. The instruments used for Plant Tissue Culture
3. Preparation of stock solutions and nutrient media
4. Sterilization techniques
5. Organ culture and their applications
6. Synthetic seed production, Micropropagation and Cryopreservation

❖ Course Outcomes

After completion of this course, students should be able to,

1. Basic concepts of Plant Tissue Culture (PTC)
2. Laminar air flow, Autoclave, Growth chamber
3. Glassware washing and sterilization technique
4. Preparation of stock solutions and nutrient media
5. Plant growth regulators (Growth Hormones)
6. Types of organ culture and their applications
7. Synthetic seed production
8. Strategies of micropropagation

About College

Vinayak Vidnyan Mahavidyalaya was established in the year of 2007 by the Pravin Khodke trusts, Amravati with view a to boost higher education in the rural area. The college is affiliated to Sant Gadge Baba Amravati University, Amravati and Government of Maharashtra. Presently the college offers two UG courses i.e. Bachelor of science with subjects of Botany, Zoology, Chemistry, Mathematics, Computer science, Electronics and Bachelor of commerce

At the initial stage, the strength of college was less but continuous increase in the number of students is an indicator of the college's potential for development. In future the college can be very well developed as a major centre of higher education for socially and economically backward students of this area.

About E-certificate course

We all are aware that the students are facing the problem of regular classroom education because of lockdown period due to pandemic COVID-19. To overcome this academic lag our college is hosting E-certificate course to reach out wider range of college students (participants) with the topic "Plant Tissue Culture" from the prescribed syllabus as per University.

We are taking an initiative to upgrade the knowledge of the students about their subject and also trying to keep them engage academically at home during this critical quarantine period. This is the online platform for the UG and PG students which provide an opportunity to learn from home a part of syllabus.

Session-2018-19

Objectives:

- To enhance computation skills in students.
- Improve mathematical calculations.
- To develop analytical thinking through Vedic Mathematics

About Vedic Mathematics:

Vedic Mathematics was discovered by Indian mathematician Jagadguru Shri Bharathi Krishna Tirtha in the period between A.D. 1911 and 1918. Later the findings were published in form of a book on Vedic Mathematics by Tirthaji Maharaj who was also known as Bharati Krsna. Bharati Krsna was born in 1884 and died in 1960. He was a brilliant student, obtaining the highest honours in all the subjects he studied, including Sanskrit, Philosophy, English, Mathematics, History and Science. When he heard what the European scholars were saying about the parts of the Vedas which were supposed to contain mathematics he resolved to study the documents and find their meaning. Between 1911 and 1918 he was able to reconstruct the ancient system of mathematics which we now call Vedic Mathematics. Vedic Mathematics is a collection of Techniques/Sutras to solve mathematical arithmetic in easy and faster way. It consists of 16 Sutras (Formulae) and 13 sub-sutras (Sub Formulae) which can be used for problems involved in arithmetic, algebra, geometry, calculus, conics. Vedic Mathematics is a system of mental Mathematics. Many of the Vedic methods are interrelated. This is in complete contrast to the modern system. Using regular mathematical steps for solving problems at times are intricate and time consuming. But using Vedic Mathematics' General and Specific Techniques numerical calculations can be done very fast and accurately. Vedic Mathematics saves a lot of time, as calculations are much easier and faster. Definitely these techniques would be handy for the students during exams and particularly for the competitive exams which are time bound.

Certificate Course 2018-2019

Title – English Language Skills and Training Program

Objectives:

Poor spoken English may be keeping a large number of India's engineers from landing in some of the best paid jobs in the country. A study has found that an overwhelming 90 per cent of graduates in the **country cannot speak English, required for corporate jobs**. Moreover, as per the report based on the study, about 80 per cent of the students graduating from colleges every year do not possess spoken English skills required for any job in knowledge economy. Although the problem is far more pronounced in tier 2 and tier 3 city students, instilling spoken English skills is a big challenge in these students. About 10,00,000 students graduate annually in India. Recruiters and HR managers around the world report that candidates with English skills above the local average stand out from the crowd and garner 30-50 per cent higher salaries than similarly qualified candidates without English skills & in India the trends are no different, with English fluency being one of the key quality recruiters look for during the interview. Students must be able to communicate technical ideas clearly in interviews.

Proficiency in spoken English gives confidence. The key problem faced by the students is pronunciation, followed by skills, grammar and sentence construction. Students show a larger gap in elements of spoken English, pronunciation and fluency, followed by grammar, though they do relatively better in understanding English. As per the report, only 10 per cent graduates show the ability to speak or respond spontaneously. English is the global language of business and indeed enterprise. The situation is unlikely to change in a globalized economy in the future. Therefore, proficiency in English must be seen as a necessary skill.
