World Wetland Day

2<sup>nd</sup> February 2020

**Day:** 6<sup>th</sup> February 2020

**Venue:** Wetland at Nandgaon (kh) towards Ner, Yavatmal road

**Method:** filed Visit

**Organized by:** Department of zoology

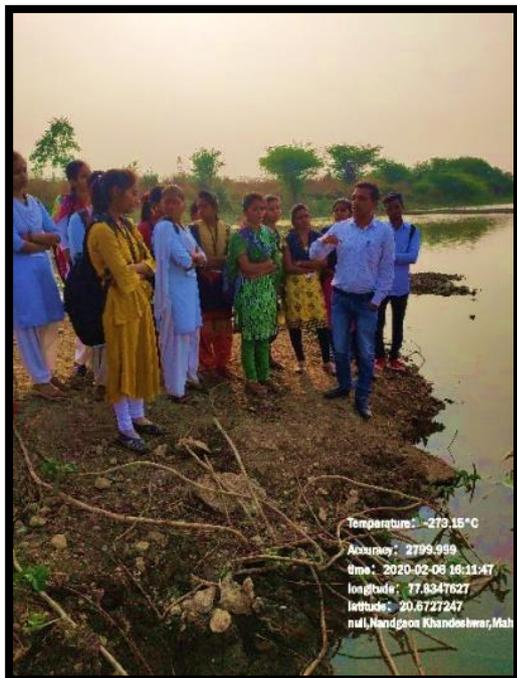

Wetlands are considered the kidneys of earth. Wetlands are area of fresh water habitat, which could be natural or man-made. In the recent years through many researches it has been found that wetland are not just a peaceful and pleasant site to be viewed, but they are the great place that inhabits diverse organisms from birds to butterflies and from huge trees to aquatic vegetation.

as

Department of zoology at Vinayak Vidnyan Mahavidyalaya, Nandgaon Khandeshwar took an initiative to create awareness among the student of B.sc (F.Y/S.Y/ T.Y) towards the greatness and significance of wetland in human life. A field visit was organised by department of zoology to a nearby wetland on the occasion of world wetland day celebrated throughout the globe on 2<sup>nd</sup> February. This year the 2<sup>nd</sup> February 2020 was Sunday, hence few days later on 6<sup>th</sup> February a visit was organised to a nearby wetland area. The students were excited to know many different facts related to wetland. The local resident student expressed that they have been unaware of even the existence of this wetland and they said we never noticed this place, as it is mostly used by villagers for open defecation and hence students' girls and boys avoid visiting the place. The members of the department of zoology felt the same, as the area was very unhygienic and poorly managed. Dr. Gajendrasingh Pachlore of department of zoology suggested the student to take pioneer role in cleanliness of this wetland and also for creating awareness among residents to keep the hygiene .Mr. Subodh Bansod, gave a quick tour of different birds that were present on the bank of the wetland and also mentioned some interesting facts related to birds. The

faculty of botany and Head of the department of botany doctor Suchita Khodke also accompanied in the visit, she explained to the student the floral diversity around the place.

The visit was organised during the college time. The place was very near hence students and teachers took a walk to the wetland. The local student gave a valuable input on the seasonal changes they have noticed in this water-body; also they mentioned that the wetland was only used for dumping the waste and idols during festive seasons. The department of zoology took notice of all the concern issues and decided to make a strategic approach to counter the poor management of wetland.

The visit to this wetland was really an eye opener for the members of the department as well as for the students. The students insisted to organize similar such visit to a wetland which is richly inhabited.

**Title: Educational Tour at Raman Science Centre, Nagpur**

**Date: 27<sup>th</sup> November 2021**

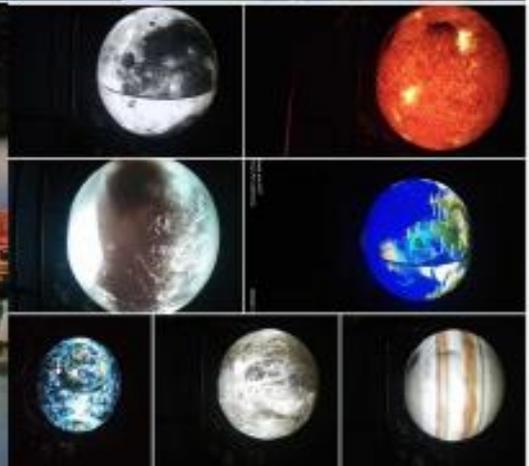

Educational tour objectives, students need to apply skills, values and general knowledge in new settings. It is a great and actual way to learn specific subjects beyond textbooks and lectures. Study tours can be a great way to learn new things about different cultures and be aware of certain differences between them, as well as similarities. It makes students see certain issues in a new perception and some study tours even allow students to immerse themselves in a different community. In return, they are exposed to cultures of different socio-economic statuses which help them build consideration and better thoughtful for these cultures.

Science is a part of our routine life and is universal. There is a necessity to have clear vision and determination to pursue it and Raman Science Centre is a place which helps students in giving that vision and determination. This tour not only enhanced their quality to know more in depth, but also provide proper guidance to sightsee more and come up with new ideas.

At this Raman Science Centre, students observed Spiral musical pipe and understood its functioning. They also observed Size-weight illusion, Kinetic sculpture, Pendulum wave, Invisible chair, Colour filters, Colour TV principle, Hyperbolic, Simple camera, Taller and easier balance, illusion mechanism, pattern recognition. Students also collected an information of Scientists and their Inventions. Students enjoyed the experiments placed in 3D show of Apollo and Planetarium the story "The Sun". Students also experienced learning and understood that science is really fun and full of knowledge.

Sant Gadge Baba Amravati University Amravati organised Avishkar competition on dated 07 January 2020 to motivate the students towards the research and invention.

Keeping this in mind Department of Zoology of Vinayak Vidnyan Mahavidyalaya created a mobile kitchen waste decomposer model to produce compost fertilizer. Daily generated vegetable waste in the kitchen can be used to produce compost. It is very cheap and easy to handle model and anyone can use the model. For this model we require a Dustbeen, a tap, a small basket. Make hole to the dustbeen and fit a tap at the bottom of the dustbeen. Placed reverse basket in the dustbeen. Now add daily generated kitchen waste into it. Add organic powder after every 3-4 days. The material starts to decompose rapidly. After few days the material will finely decomposed. Now you can use this as a fertilizer. You can also collect decomposed water from it. Add water in the dustbeen and open the tap to collect the decomposed water. Students successfully and confidently presented the model in the Avishkar 2020 competition.

Non-Venomous Snakes are usually harmless to humans.  
 These snakes have teeth, just like venomous snakes so in the event of a bite from a non-venomous snake, as with any small injury care should be given to avoid infections.

1. If the small scales are present on the belly and back, it is a non-poisonous snake.
2. If the belly scales are not broad enough to extend right across it, it is a non-poisonous snake.
